Advancing the Delivery of Home Infusion Therapy

The CURLIN 6000 Pump is an innovative, multi-therapy pump designed for more precise and efficient infusions.

Home healthcare and drug advancements place new demands on infusion devices.

Today’s pharmaceutical market and the future of infusion therapy are rapidly moving toward biologics and microdosing. New personalized and targeted drugs and costly biologic products are treating infections, cancer, and chronic diseases, and many of these medications can be administered more effectively in the patient’s home. As a result, home infusion specialists are seeing the benefits of safer, more accurate, and more efficient infusion devices.

Shifting patients from hospitals to ambulatory settings delivers savings of up to 60% per infusion.1

Advancing the Delivery of Home Infusion Therapy
The CURLIN 6000 Pump is an innovative, multi-therapy pump designed for more precise and efficient infusions.

Home healthcare and drug advancements place new demands on infusion devices.

Today’s pharmaceutical market and the future of infusion therapy are rapidly moving toward biologics and microdosing. New personalized targeted drugs and costly biologic products are treating infections, cancer, and chronic diseases, and many of these medications can be administered more effectively in the patient’s home. As a result, home infusion specialists are seeing the benefits of safer, more accurate, and more efficient infusion devices.

Shifting patients from hospitals to ambulatory settings delivers savings of up to 60% per infusion.1
When precision and accuracy matter most

The superior flow resolution and continuity of the CURLIN 6000 are essential when administering infusions to sensitive patient populations, and for infusing short half-life drugs as well as other drugs delivered at a low infusion rate.

With rising drug costs, efficient and accurate dosing has become more and more important to payers, pharmacies, and patients.

The pump that exceeds safety goals

With the Moog CURLIN 6000 Ambulatory Infusion Pump, Moog offers delivery of a broad range of critical, high-consequence medications with a high degree of accuracy and reliability. Safety measures include:

- Multiple therapy flexibility
- When infusing drugs with different flow requirements and flow characteristics, the pump ensures that each is delivered as accurately and reliably as possible.

Enhancing safety and efficiency

The CURLIN 6000 Ambulatory Infusion Pump by Moog is uniquely designed to bring home healthcare clinicians and pharmacists more precise, accurate, and efficient infusions. The patented curvilinear peristaltic design delivers fluid in smaller, more frequent boluses than standard linear peristaltic infusion pumps. Resolution of Flow (Resolution of Flow)

This provides more steady fluid delivery throughout the entire infusion duration (Continuity of Flow), which can be a significant factor in improving patient outcomes.

With multi-therapy delivery options, a compact size, and built-in safety protocols, the CURLIN 6000 Pump is ideal for the growing home infusion therapy market.

With rising drug costs, efficient and accurate dosing has become more and more important to payers, pharmacies, and patients.

The pump that exceeds safety goals

With the Moog CURLIN 6000 Ambulatory Infusion Pump, Moog offers delivery of a broad range of critical, high-consequence medications with a high degree of accuracy and reliability. Safety measures include:

- User-friendly safety alarms, locks, and added help screens
- MedLIMITs feature sets hard limits that cannot be exceeded without reprogramming the pump
- Proprietary Protocol Library Safety System™ drug error reduction software

Additional information on how the CURLIN 6000 ensures accurate delivery of critical medications can be found in a recently published whitepaper entitled “Why Your Choice of Infusion Pump Matters to Patient Outcomes.”

With rising drug costs, efficient and accurate dosing has become even more important to payers, pharmacies, and patients.

Multiple therapy flexibility

With our variable flow-rate mechanism – selecting an infusion pump with smart safety features is critical. The CURLIN 6000 offers clinical, user-friendly features that are needed to better compliance and prevent clinical failures. Safely measurable are:

- Improved patient safety with software
- Multiple therapy delivery
- User-friendly safety alarms, locks, and security screens

The pump that exceeds safety goals

With the Moog Clinical Team providing a variety of classes and custom resources seamlessly available through live stream video, our Clinical Specialist will connect you to the pump technologies from any device in any location, all at your own pace! This comprehensive program supports you in administering clinical or customer support.

Supporting You

Speak live with a Moog Clinical Representative AM - 5:00 PM (Mountain Time) for customer questions, orders, complaints, and RMA support. Call 800-980-2053 for the local Moog medical sales representative.

Committed to Supporting You

Live Clinical & Customer Support

Open Monday through Friday, 7:00 AM - 5:00 PM (Mountain Time) for customer service and pump technical support. For pump questions, orders, complaints, and RMA support, please contact your sales representative or call 800-980-2053.

E-Learning

Become familiar with our pump technologies from any device in any location, all at your own pace! This comprehensive program supports you in administering clinical or customer support. Paying new employees as they are hired, track all training progress for your facility, and take reports to evaluate education compliance.

On-Site Education

For large groups, our Clinical Team can work with you to administer a session and ensure that clinicians and pharmacists have the opportunity to ask questions, orders, complaints, and RMA support. Call 800-980-2053 for the local Moog medical sales representative.

Online Training Materials

The curlinpump.com website offers a variety of educational resources, such as training videos, resource library, a virtual pump, and more.
